SALES & SERVICING OF LASER CUTTING MACHINES

ABOUT MSS

With a team of experienced and highly qualified engineers with an unrivalled knowledge of both the laser and gas generation industry, MSS are able to offer "The Total Laser Cutting Solution".

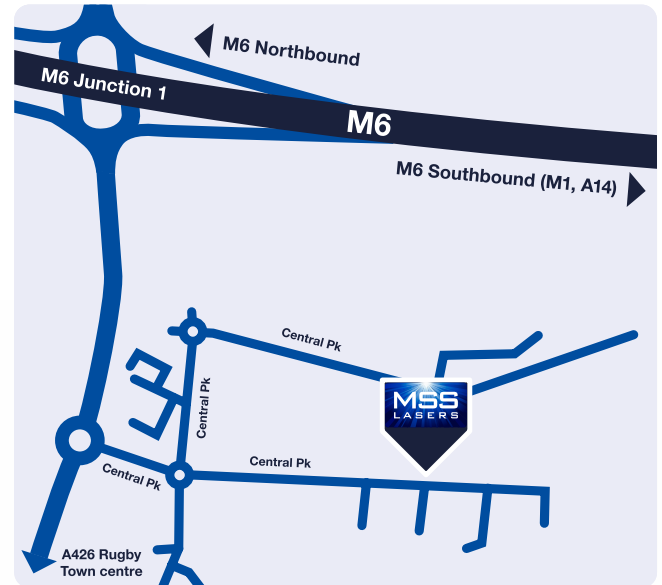

MSS was formed in 2003 with the aim of offering a complete service to the laser cutting industry, with the company's excellent reputation for servicing all makes of laser cutting machine, providing the springboard for the company's growth. MSS Lasers have become leading specialists in the sale of fully reconditioned laser systems and UK market leaders in the supply of high pressure nitrogen generation equipment to the laser industry.

UNITS 9 - 10 ALLERTON ROAD
CENTRAL PARK, RUGBY CV23 0PA

DIRECTIONS

We are situated just 2 minutes from J1 of the M6 motorway. Central Park is well signposted off the A426.

SALES & SERVICING OF LASER CUTTING MACHINES

SPECIALISTS IN HIGH QUALITY REFURBISHED LASER CUTTING MACHINES

Our aim is to offer our clients the type of experience, and the professional levels of service and support, normally associated with the purchase of a new CNC laser.

AS GOOD AS NEW

MSS specialise in the supply of quality used machines from the world's leading laser system manufacturers. All of our machines are subject to stringent reconditioning procedures and quality appraisal prior to delivery, so they perform to original specification and look and work as good as new, but at a fraction of the price.

RIGHT FOR YOU

MSS are proud to remain independent, offering completely impartial and expert guidance without bias toward a particular brand of machine. Our demonstration facility allows clients to see a range of fully operational CNC lasers from different manufacturers, enabling you to choose the best equipment for your application and budget.

PEACE OF MIND

Our expertise in laser cutting and high quality standards take the uncertainty out of purchasing used equipment. After you have chosen your machine, we deliver and install at your chosen location and our highly qualified engineers provide comprehensive staff training. We ensure the machine is working as it did when new, and that you are comfortable operating it before we leave.

WARRANTY

Our service doesn't end once the machine is installed. Every machine sold comes with a full comprehensive parts and labour warranty, as well as ongoing technical and service support from MSS Lasers, the UK's largest independent service provider in the laser cutting industry.

THE BEST AFTER SALES, SERVICE AND SUPPORT IN THE UK

TRUST THE BEST

We are the UK's largest independent service provider for laser cutting machines in the sheet/plate working industry. When it comes to being the best in our industry, size and experience do count!

THE BEST PEOPLE

Like any business offering service, it is all about having the best people in the right job. With decades of experience working for laser system manufacturers, our engineers are highly qualified and conversant with machine, laser source, CNC control and cutting applications, helping to keep your machine working for you.

PREVENTION IS BETTER THAN...

We will of course always come and repair your machine should it ever breakdown, using our own highly trained engineers to get you back up and running as quickly as possible (we understand time is money when your machine is down!). However, prevention is better than cure, so we offer cost effective service and preventative maintenance contracts that also include consultancy and training to help keep downtime to an absolute minimum.

WHAT OUR CLIENTS SAY ...

"Knowledgeable engineers and response times of 24 hours or less sets MSS apart from the rest."

Mike Jeffs, MPJ Fabrications Ltd

"The machine was delivered and refurbished to the exact standard promised and now produces parts, so accurately and efficiently, that we are now bringing in many hours of contract work per day, resulting in the machine being self financing. We would recommend MSS to any prospective purchaser"

John Parker, JP Exhausts (Macclesfield Laser)

LEADING PROVIDER OF IN-HOUSE NITROGEN GENERATION SYSTEMS

MSS nitrogen generation systems are well proven, with over 160 lasers running in the UK with MSS equipment. Utilising our knowledge of laser cutting, our systems are tailored to the exact needs of individual clients, providing pure, high pressure gas, on demand.

SAVE MONEY

Nitrogen gas contributes a significant drain on laser operating costs. So now imagine being able to produce your own... you could be saving £1000's every month. Guaranteed low cost nitrogen, no gas rental or delivery charges and an end to spiralling gas costs.

SAVE TIME

Now work out how much time you spend ordering gas, accommodating deliveries and stopping machines whilst changing gas. Think about the man hours lost during this process...

24 HOUR OPERATION

Have you ever unexpectedly run out of gas, especially over the weekend or experienced gas not being delivered on time. Well now imagine having 24/7 continuous operation with no machine downtime...

COMPETITIVE EDGE

Problems with the "oxide edge" on mild steel components? With a nitrogen generator, high power lasers can cut carbon steels faster and cheaper than oxygen, with NO oxidation. Increasing your competitive edge.

SELF FINANCING

Because laser users have to use nitrogen on their machines, the cost of purchasing our equipment is self financing, using money which you would otherwise have spent on ready made nitrogen, effectively a consumable!

TO DISCOVER THE ACTUAL MONEY AND TIME YOU CAN SAVE AND FOR MORE INFORMATION, PLEASE CONTACT US OR VISIT OUR SHOWROOM TO SEE A DEMONSTRATION OF THE SYSTEMS WORKING.
